

Dismantling the bottom of the container

This gives an insight into the technology of the device.

Written By: Leonard Kesting

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [Spanner 6mm](#) (1)
-

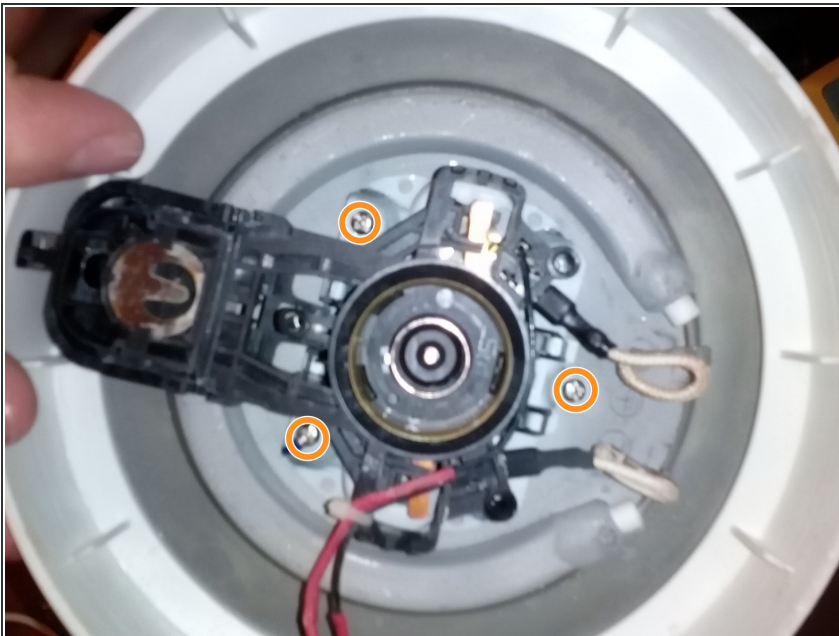

Step 1 — Removal of soil

⚠ Pay attention to the supply!

- The three screws in the bottom with a 6mm Spanner bit loose (identical).
- The floor falls out now.

Step 2

- The electronics are now available.
- If this is to be dismantled, the three marked screws must be removed with a screwdriver PH1.

Arbeite die Schritte in umgekehrter Reihenfolge ab, um dein Gerät wieder zusammenzubauen.
